### Project Details:

#### IOO Labs Pvt Ltd. :-

##### Project #1

Project Name: **Xcelerator**

Technologies: React-Native, ES6 (Native App), AWS S3, Implementing Restful API's.

Role: Native App Developer

Client: Xcelerator Ninja ( <https://xcelerator.ninja/> )

Duration: Aug 2018 - Present.

Team Members: 1

Methodologies: Agile Methodology.

Description: Xcelerator helps college students build a portfolio of skills aligned to their career aspirations. The platform creates a gamification layer to integrate and align everything a college student

does (education, exposure, experience) to specific job roles chosen by the students - all the while creating personal paths to success for them.

**Responsibilities:**

- Interacting with client on sprint basis to discuss about the upcoming design models and flow of the application.
- Implemented full application flow single handedly with dummy values and context as per UX design and wireframe before the kick-off of the sprint.
- Completing modules and phases of application development with respect to sprint plan and testing the application flow before sprint delivery.
- Providing demo to client by building app in debug mode so that they can share their inputs.
- Providing signed apk build, once sprint build is accepted by the client.
- Sometimes worked on maintenance and enhancement of some features as per client requirements.

**#2**

**Project Name:** **MobE (Mobile Ethnography)**

**Technologies:** React-Native, ES6 (Native App), AWS S3, Implementing Restful API's.

**Role:** Native App Developer

**Client:** Peepal Design (

**Duration:** February 2018 - July-2018.

**Team Members:** 1

**Methodologies:** Agile Methodology.

**Description:** Ethnography is a scientific research strategy often used in social science. It is often employed for gathering empirical data on human societies and cultures. Data collection is often done through participant observation, interviews, questionnaires, etc.

Peepal Design came up with a product idea which comprises of two application, web and mobile. Web application is build for Researchers who will be collecting data from Participants and will provide compensation based on their inputs.

**Responsibilities:**

- Interacting with client on sprint basis to discuss about the upcoming design models and flow of the application.
- Implemented full application flow single handedly with dummy values and context as per UX design and wireframe before the kick-off of the sprint.
- Working closely with client for constant improvements and enhancements in some features such as video/audio modules of application.
- Completing modules and phases of application development with respect to sprint plan and testing the application flow before sprint delivery.
- Providing demo to client by building app in debug and test flight mode so that they can share their inputs.
- Providing signed apk build, once sprint build is accepted by the client to be uploaded in playstore.
- Sometimes worked on maintenance and enhancement of some features as per client requirements.

**PRAKAT SOLUTIONS :-**

**Project #1**

**Project Name:** **RHSS.com (AltisourceRentals.com)**

**Role:** Lead UI/UX Developer and Team Lead.

**Client:** Altisource USA.

**Description:** The objective of the website redesign of 'altisourcerentals.com' is to provide end to end capability to the customer for reserving and moving into the property by online application process with least manual effort. The website will be redesigned to automate the complete process of applying for a property and moving in at the end without any manual processing.

**#2**

Project Name: **PATT (PRAKAT ACCESSIBILITY TESTING TOOL)**

Description: Prakat is a technology solutions company specializing in Software Test Engineering, Accessibility Assurance, and Product Engineering. Prakat provides Strategic, Niche and Vanilla Testing Services that turn your unique vision for software testing into an exact result.

**#3**

Project Name: **Track Rider Location.**

Description: This project is divided into two applications i.e. android application and web application. Android Application sends the location of logged users using OSM in every 2 minutes in pair that is longitude and latitude to the database using few PHP API's. On the other side the Web Application is used to track the riders who may or may not be travelling in groups. It fetches the data from the server as per required and show the location on fellow riders on OSM so that person travelling together can know that where is current location of others and which path they are following.

**#4**

Project Name: **PTP (PRAKAT TESTING PLATFORM).**

Description: Prakat is a technology solutions company specializing in Software Test Engineering, Accessibility Assurance, and Product Engineering. Prakat provides Strategic, Niche and Vanilla Testing Services that turn your unique vision for software testing into an exact result.
